

## *Steps for Creating a Weebly Website*

*The steps for creating a basic Weebly website are the following:*

1. Create an account at <http://www.weebly.com/>.
2. Click the button, "Create a Site," and give it a name and click "Continue."
3. Looking at the tabs, "Designs," select one by dragging to the page below. [It sometimes takes a few moments to load, so be patient.]
4. Next click on the "Elements" tab. This allows the adding of various content by dragging selected components (title, texts, photos, video, audio, etc.).
5. The next tab is "Pages"; select the number of pages desired and click, "Save."
6. Continue to add the elements wanted for each page.
7. Click the "Save" button.
8. When done, click "Publish." [The website is hosted free through Weebly. Any page can be edited by returning to it, making changes and clicking "Save" and "Publish" buttons].
